SUMMARY

Motivated Software Engineer with a development journey spanning from **2021**, beginning at the academic level and steadily growing into a professional contributor. Over the years, built and evolved real projects from the ground up, progressing from foundational concepts to increasingly complex systems, while continuously expanding skills through strong self-study habits. Brings **3+ years** of hands-on development experience alongside **6 months** of internship experience, where contributions went beyond coding to include conducting KT sessions, participating in tech talks, debugging, performance optimization, and supporting deployment processes. Currently deepening expertise in modern development practices and cloud technologies. Passionate about clean architecture, knowledge sharing, and growing as a well-rounded engineer within a collaborative team.

EXPERIENCE

Intern Software Engineer · NEXOVA IT SOLUTIONS

Sep 2025 – Feb 2026

Collaborated with a development team as a Full-Stack Developer, contributing beyond coding, gaining hands-on experience in deployment handling, presentations, KT sessions, and tech talks.

Full-Stack Developer · KreedX Development Club — Startup Tech Community

Jun 2024 – Present

Collaborated startup tech community to deliver full-stack solutions for multiple client projects. I am Responsible for full-stack development.

EDUCATION & CERTIFICATIONS

– iCET ICD Developer Programme · Institute of Computer Engineering Technology (iCET)

Nov 2024 – Present

Building expertise in enterprise application development using Java and Spring Boot, with strong foundations in Object-Oriented Programming (OOP), design patterns, and modern software architecture. Practiced web application development using HTML, CSS, JavaScript, and Bootstrap, and later expanded frontend development skills with React and Angular. Experienced in version control using Git and familiar with MVC coding architecture, Layered Architecture, and Microservices Architecture.

– G.C.E. Advanced Level — Technology Stream (IT) · Sri Sumangala National College, Kelaniya

2021 A/L

Achieved District Rank 161 and Island Rank 1561 in the Technology stream.

● Kubernetes For Absolute Beginners — KodeKloud [View Certificate](#)

February - 2026

● Docker Foundations Professional Certificate — LinkedIn [View Certificate](#)

February - 2026

● Learning Redux Toolkit — LinkedIn [View Certificate](#)

March - 2026

● AWS Basics — KodeKloud [View Certificate](#)

March - 2026

● Git | GitHub 8-Day Workshop — Pro Code Lab (PCL) [View Certificate](#)

March - 2025

TECHNICAL SKILLS

Frontend

– React, Angular, JavaScript, TypeScript, HTML5, CSS3, Redux

Backend

– Java, Spring Boot, Node.js, Express.js, PHP

Databases

– MySQL, MongoDB, PostgreSQL

Tools & Practices

– GitHub, Postman, Docker, OOP, MVC, Layered Architecture, MicroServices, Monolithic, Event Driven, Agile/Scrum

Soft Skills

– Working with Agile Environment, Problem Solving, Team Collaboration, Quick Learning, Adaptability, Debugging & Troubleshooting, Knowledge Sharing

PROJECTS

Hotel POS Management System *React | Spring Boot | MySQL | Flyway | WebSocket | Swagger*

Completed — Intern Project

– Multi-company POS built with layered architecture, JWT auth, Redux state management, real-time WebSocket updates, and Recharts visualisation. Collaborated with 3 developers using GitHub, managing dependency conflicts across parallel workstreams. Validated REST APIs via Postman and Swagger, and improved backend performance through layered decoupling. Used Docker for Containerization

Dev Docrizer *React (Vite) | Node.js | Express | MongoDB* [View Project](#)

Ongoing — Individual

– A developer-focused resource hub that centralises project assets such as requirements, ER diagrams, Figma links, and DB scripts into organised collections, solving the common problem of scattered or lost project resources. Supports bulk export of saved assets as a **ZIP** file for easy access and portability.

Library Management System *Java · JavaFX · Jasper Reports · MySQL*

Completed — Individual

– A comprehensive Library Management System built with JavaFX that provides complete CRUD operations for managing library resources. This system streamlines library operations with an intuitive interface and robust functionality.

– A web-based restaurant management system for MOS Burger that provides comprehensive functionality for order management, customer management, and store operations.
